

# Internship Opportunity!

Are you interested in wildlife education? Do you want to work for an organization committed to wildlife conservation through education, preservation and rehabilitation?

**Brokner Nature Center is the place for you!**

Brokner Nature Center's mission is to promote the appreciation and understanding of wildlife conservation through education, preservation and rehabilitation. We specialize in hands-on educational programs that promote and inspire a connection to wildlife and wild places. The purpose of our wildlife rehabilitation program is to educate people regarding the natural history of Ohio's wildlife, to offer help and advice when wildlife and people conflict, and to care for, rehabilitate, and release native Ohio wildlife expected to survive in the natural environment.

- Interns work closely with our wildlife rehabilitation program, one of the largest of its kind in the state.

- Interns lead and develop educational programs that are offered both at the nature center and in school classrooms.
- Our internship is designed to foster and encourage individual growth, and instill skills in education, wildlife management, land stewardship and non-profit administration.

Housing and a stipend are available. We look forward to hearing from you!

If interested, please send a cover letter and resume to [wildlife@bruknernaturecenter.com](mailto:wildlife@bruknernaturecenter.com)
